

Developing Performance Metrics for Drug Enforcement

**Evaluating the Efficacy of the Multijurisdictional Task
Forces Using a Tiered and Priority Scoring System**

Fiscal Year 2014 through Fiscal Year 2019

December 2019

Michigan State Police
Grants and Community Services Division

In cooperation with:

Michigan State Justice Statistics Center

The School of Criminal Justice at Michigan State University, through the Michigan Justice Statistics Center, serves as the Statistical Analysis Center (MI-SAC) for the State of Michigan. The mission of the MI-SAC is to advance knowledge about crime and justice issues in the State of Michigan while also informing policy and practice. The MI-SAC works in partnership with the Michigan State Police (MSP), Michigan State's Administering Agency, as well as with law enforcement and criminal justice agencies serving the citizens of Michigan.

For further information, see: <https://cj.msu.edu/community/mich-stat.html>

Grant Information

This project was supported by grants 2012-DJ-BX-0109, 2013-MU-BX-0051, 2014-MU-BX-1022, 2015-MU-BX-0964, 2016-MU-BX-0703, and 2017-MU-BX-0191 awarded by the Bureau of Justice Assistance, Office of Justice Programs, United States (U.S.) Department of Justice (DOJ), and administered by the MSP. Points of view or opinions contained within this document do not necessarily represent the official position or policies of the DOJ or the MSP.

About the Authors

Megan Gilliam is an M.S. candidate in the School of Criminal Justice at Michigan State University. During her graduate studies she has worked as a research assistant for the School of Criminal Justice, working on projects with the Michigan State Police, Grants and Community Services Division. She received her B.A. in English and Sociology with a Criminology concentration in 2018 from Valparaiso University.

Edmund McGarrell is a Professor in the School of Criminal Justice at Michigan State University. He is the director of the Michigan Justice Statistics Center that serves as the Statistical Analysis Center for the State of Michigan. His research focuses on communities and crime with a specific focus on violence prevention and control. Recent articles appear in the following journals: *Crime and Delinquency*, *Criminology and Public Policy*, *Journal of Criminal Justice*, and *Journal of Experimental Criminology*.

Executive Summary

This report observes a total of 24 Multijurisdictional Task Forces (MJTFs) to present and evaluate drug-related arrests made by each MJTF from fiscal year (FY) 2014 through FY 2019. The drug categories included in this report are heroin, fentanyl, prescription opiates, methamphetamine, cocaine, marijuana, prescription stimulants, prescription depressants, and synthetic drugs. As is discussed in detail in the Overview section of this report, the Michigan State Police (MSP) places a high priority on combatting drugs that have the potential to cause the most harm to individuals and the public. Therefore, the drug categories trafficking tiers are ranked by numeric priority values that allow researchers to transform raw arrest numbers into arrest scores. These arrest scores are generally prioritized over raw arrest numbers because they reflect the MJTFs' focus on potentially more harmful drugs. (See Table 1 for the priority scoring guide used by researchers to calculate these arrest scores).

This summary contains arrest data for each reported drug category in order to provide an overview of the MJTFs' impact on drug-related crime in FY 2019. Because of the importance placed on arrest score data rather than raw arrest numbers, the following highlights contain only arrest score data. The drug categories are arranged below from highest priority value to lowest priority value.

- Heroin: The total heroin arrest score increased from 11,850 in FY 2018 to 12,846 in FY 2019, resulting in an 8.41% increase.
- Fentanyl was added as a drug category in FY 2019 with a total arrest score of 1,098 across the MJTFs.
- Prescription opiates: The total prescription opiates arrest score decreased from 7,266 in FY 2018 to 4,410 in FY 2019, resulting in a 39.31% decrease.
- Methamphetamine: The total methamphetamine arrest score decreased from 12,909 in FY 2018 to 11,796 in FY 2019, resulting in an 8.62% decrease.
- Cocaine: The total cocaine arrest score decreased from 17,601 in FY 2018 to 10,581 in FY 2019, resulting in a 39.88% decrease.
- Marijuana: The total marijuana arrest score decreased from 6,224 in FY 2018 to 1,221 in FY 2019, resulting in an 80.38% decrease.
- Prescription stimulants: The total arrest score for prescription stimulants decreased from 270 in FY 2018 to 181 in FY 2019, resulting in a 32.96% decrease.
- Prescription depressants: The total arrest score for prescription depressants decreased from 424 in FY 2018 to 70 in FY 2019, resulting in an 83.49% decrease.
- Synthetic drugs: The total arrest score for synthetic drugs decreased from 153 in FY 2018 to 57 in FY 2019, resulting in a 62.75% decrease.

More information about these statistics can be found in Table 4 and Figure 1 of this report.

Overview

Introduction and Purpose of the FY 2014 through FY 2019 Study

MSP recognizes the role illegal drug production, abuse, and trafficking plays in violent and property crime, accidental deaths, and drugged driving. Consequently, MSP has placed an emphasis on developing a statewide drug enforcement strategy that includes new metrics used to measure enforcement activities and track progress toward reducing the level of illegal drug production, abuse, and trafficking, and the public safety and health problems associated with illegal drugs. A key component of MSP's drug enforcement strategy is a series of MJTFs that focus on drug-related crimes within specific regions of the state. Each MJTF investigates drug crimes within their jurisdiction, comprised of one or more counties. MJTFs' operations are based on the principles of bringing additional resources from multiple agencies, improving coordination and communication across agencies, and being able to follow illegal drug activities across jurisdictional boundaries.

As previously stated, MSP's strategic plan has prioritized developing meaningful performance metrics for MJTFs. As a result, a core element of the performance measures is the prioritization of harm associated with illegal substances, and this is reflected in the current arrest scoring system. Prior to the implementation of the new arrest scoring system, the previous scoring system was based on a level system that categorized offenders and drug quantities ranging from Level I (least harm) to Level III (most harm). (The previous scoring table can be found in Appendix B). In 2014, the new tiered scoring system with redefined categories was employed, accompanied by a scoring guide to transform raw arrest numbers into arrest scores. The scoring guide was created based on the amount of harm caused by a drug. Each drug category is assigned a priority value, and each trafficker tier is assigned a point value based on the corresponding priority. This new system allows high priority drugs and higher tier arrests to be given more value than low priority drugs and lower tier arrests. (Refer to Appendix A for drug trafficking tier definitions.) In FY 2019, the drug category "Fentanyl" was added to the scoring guide. This scoring guide, shown and explained below, is used to measure MJTF performance based on the calculated arrest scores.

The first edition of this report evaluated FY 2014 and FY 2015 data and was published in May 2016 by Amanda Nguyen, M.S., and Edmund McGarrell, Ph.D. The report proved to be an efficient way of displaying the data collected from the MJTFs; thus, it was decided the report would be updated annually to include MJTF data from the most current fiscal years.

Priority Scoring Guide

Table 1 below shows the priority scoring table used to transform raw arrest numbers into arrest scores based on the type of drug and tier. The general purpose of this scoring system is to place a higher priority and value on arrests made for drugs that are particularly harmful to individuals and the public. For example, a single tier-one arrest for a high-priority drug, such as heroin, yields a higher arrest score than five tier-one arrests for a low-priority drug, such as prescription stimulants. This scoring system reflects the strategic emphasis MSP has placed on public health and safety, rather than an emphasis on high arrest numbers alone. Note that this

report also prioritizes arrest score data over raw arrest numbers. Therefore, raw arrest numbers are omitted frequently, although not entirely, throughout the report.

Table 1: Priority Scoring Table

MJTF Arrest Scoring Grid		Trafficker Tier and Value			
		1	2	3	4
Drug Category	Priority Value	1	5	25	50
Heroin	6x	6	30	150	300
Fentanyl	6x	6	30	150	300
Prescription Opiates	6x	6	30	150	300
Methamphetamine	3x	3	15	75	150
Cocaine	3x	3	15	75	150
Marijuana	1	1	5	25	50
Prescription Stimulants	1	1	5	25	50
Prescription Depressants	1	1	5	25	50
Synthetic Drugs	1	1	5	25	50
Other Drugs	1	1	5	25	50

In the “Priority Value” column above, heroin, fentanyl, and prescription opiates are listed with the highest priority value (6x). Methamphetamine and cocaine are listed with the second highest priority value (3x). The remaining categories have the lowest priority value (1). Similarly, under the “Trafficker Tier and Value” section of the table, tiers increase in value depending on the level of the tier. Tier 1 has a value of 1, Tier 2 has a value of 5, Tier 3 has a value of 25, and Tier 4 has a value of 50. This was designed to yield higher arrest scores for MJTFs who make arrests for larger quantities of more harmful drugs.

The numbers listed below the tier values (i.e., 6 through 300 in the Heroin, Fentanyl, and Prescription Opiates rows) are the products of the drug priority values multiplied by the tier priority values. These are the values researchers are immediately concerned with when calculating arrest scores. For example, two Tier 1 heroin arrests translate into an arrest score of 12. This is calculated by locating the drug’s priority value (in this case, 6x) and the tier priority value (in this case, 1). The corresponding value found in the table for a Tier 1 heroin arrest is 6. The researcher then multiplies 6 by the number of arrests (in this case, 2). Thus, the arrest score is 12. Further, if an MJTF made two Tier 2 heroin arrests, the researcher would multiply 30 by 2 for an arrest score of 60.

Section I

Overall Trends

Overall Trends

The following section outlines various trends observed in the MJTFs' data from FY 2014 through FY 2019. Total arrest scores for each MJTF are broken down by fiscal year, as well as total raw arrest numbers. The first two tables in this section also contain additional data that is helpful in comparing MJTFs, such as the number of sworn personnel per MJTF and the size of the population each serves. Also included in this section is data on total arrest scores and raw arrest numbers broken down by drug or tier, rather than by MJTF. Each table in this section contains a column that demonstrates the percent change in values from FY 2018 to FY 2019 for comparison. However, interpretations of these percent changes should be made with caution due to the impact of the new fentanyl drug category on arrest scores in FY 2019 when it did not exist in FY 2018. Raw arrest numbers are reported more frequently in this section of the report than in subsequent sections in order to illustrate the overall trends in arrests. Following this section, greater emphasis is placed on reporting arrest score data.

Important Notes:

- The word “prescription” is replaced with the medical abbreviation “Rx” in the appropriate tables and figures throughout the report.
- The category “Other Drugs” was excluded from the report in its entirety due to errors in the classifications of drugs reported as “other.”
- Fentanyl data cannot be compared to any previous years' data because fentanyl was not a drug category prior to FY 2019.
- The percent changes from FY 2018 to FY 2019 should generally be interpreted with caution due to the introduction of the fentanyl drug category in FY 2019. The drug categories between the two years are not identical.
- MANTIS was non-grant funded up until FY 2019, meaning the task force was not required to submit data to MSP until FY 2019. MANTIS submitted data to MSP from FY 2016 onward, but there are no data for MANTIS from FY 2014 or FY 2015.
- MNET is non-grant funded, so the task force was also not required to submit data to MSP. MNET submitted data to MSP from FY 2016 onward, but there are no data for MNET from FY 2014 or FY 2015.

Table 2 shows the total arrest scores obtained by each MJTF for FY 2014 through FY 2019. The percent change from FY 2018 to FY 2019 is also calculated, with green values representing a positive percent change and blue values representing a negative percent change. The MJTFs are listed from the highest percent change to the lowest percent change. As displayed above, seven MJTFs had positive percent changes in their arrest scores. The remaining 17 MJTFs saw a negative percent change. COMET had the highest percent change, increasing their total arrest score from 386 to 3,510; resulting in an 809.33% increase. Table 2 also displays the average number of sworn personnel and population served per MJTF. MAGNET obtained the highest arrest score per sworn officer with a score of 477.8.

Table 3 shows the total number of arrests obtained by each MJTF for FY 2014 through FY 2019. The percent change from FY 2018 to FY 2019 is also calculated, with green values representing a positive percent change and blue values representing a negative percent change. The MJTFs are listed from the highest percent change to the lowest percent change. As shown above, eight MJTFs had positive percent changes in their number of arrests. The remaining 16 MJTFs had negative percent changes. COMET had the highest percent change, increasing their number of arrests from 23 to 48, resulting in a percent change of 108.7%. Table 3 also displays the average number of sworn personnel and population served per MJTF. MAGNET obtained the highest number of arrests per sworn officer with a total of 21.4 arrests.

Section II

Individual Drug Categories

Individual Drug Categories

The following section details data collected by the MJTFs regarding each drug category. The drug categories included are heroin, fentanyl, prescription opiates, methamphetamine, cocaine, marijuana, prescription stimulants, prescription depressants, and synthetic drugs. Each drug category in this section contains two tables and two graphs. The total arrest scores for each MJTF for FY 2014 through FY 2019 are listed in the first table, and the corresponding bar graph illustrates the arrest scores by MJTF for FY 2019 only. The second table in each section displays the total arrest scores by tier for FY 2014 through FY 2019, and the corresponding bar graph includes only the arrest scores by tier for FY 2019. Recall that data on fentanyl arrests were not tracked prior to FY 2019; therefore, data for previous fiscal years for that category are not available.

Heroin: Priority Value 6x

Section III
Individual MJTF Performances

Individual MJTF Performances

The following section highlights the individual performance of each MJTF for FY 2014 through FY 2019. Table 26 displays the MJTFs' arrest scores per 100,000 residents for FY 2019, as well as the total population served by each. This provides readily comparable data across the MJTFs, despite variances in populations served. Included for each MJTF is the following: the MJTF's name, average number of sworn personnel, total arrest scores by tier, total number of arrests per 100,000 residents, total arrest scores per 100,000 residents, and total arrest scores by drug type. The data is represented in tabular and graphic format. Note that fentanyl data are excluded from all "Arrest Scores by Drug" graphs. However, those data can still be found in the corresponding tables.

Table 26: Arrest Scores per 100,000 Residents

Table 26 demonstrates arrest scores per 100,000 residents in FY 2018 and FY 2019, as well as the total population each MJTF covers as of FY 2019. FY 2018 is included to serve as the most recent comparison year. MJTFs are arranged in the table by order of the highest arrest scores per 100,000 residents according to FY 2019 data. This number was calculated by dividing the MJTF's total arrest score by the population served, then multiplying the calculated quotient by 100,000. In FY 2019, SANE had the highest arrest score per 100,000 residents with a score of 2,280.45.

Appendix A

Tier 1 Drug Traffickers:

A Tier 1 Drug Trafficker is any person who does not qualify as a Tier 2, 3, or 4 Drug Trafficker, but who:

- a. Is involved in the illegal distribution or possession of controlled substances as classified in Schedule I through V of the Michigan Public Health Code (except marijuana) or a controlled substance analog or anabolic steroids, in quantities of **less than 20 grams** (in powder or rock form) OR in quantities of **less than 10 dosage units** (tablets, capsule, blotter, or liquid form) in any single offense.
- b. Is involved in the distribution, possession or manufacture of marijuana, psilocybin mushrooms, or peyote in quantities of **less than 10 pounds** in any one single offense.
- c. Operates a laboratory that is used to illegally manufacture controlled substances or controlled substance analogs OR illegally possesses essential and/or precursor chemicals as defined by federal statutes in quantities of **less than 25 grams** and does not involve children exposed to hazardous materials.
- d. Is involved in the illegal use of controlled substances or the prohibited use of chemical agents and is not involved in the distribution or possession of controlled substances as described in Tiers 2, 3, or 4 of these definitions.

All original warrant charges of use and/or possession will be reported as Tier 1.

Tier 2 Drug Traffickers:

A Tier 2 Drug Trafficker is any person who does not qualify as a Tier 3 or 4 Drug Trafficker, but who:

- a. Is involved in the illegal distribution or possession of controlled substances as classified in Schedule I through V of the Michigan Public Health Code (except marijuana) or a controlled substance analog or anabolic steroids, in quantities of **at least 20 grams but less than 50 grams** (in powder or rock form) OR in quantities of **at least 10 dosage units or not more than 100 dosage units** (tablets, capsule, blotter, or liquid form) in any single offense.
- b. Is involved in the distribution, possession or manufacture of marijuana, psilocybin mushrooms, or peyote in quantities of **at least 10 pounds but less than 50 pounds** in any one single offense.
- c. Operates a laboratory that is used to illegally manufacture controlled substances or controlled substance analogs OR illegally possesses essential and/or precursor chemicals as defined by federal statutes in quantities of **at least 25 grams but less than 50 grams.**
- d. Exposes children to toxic chemicals used in the manufacturing of controlled substances.
- e. Is a licensed health care practitioner involved in the diversion of prescription drugs.
- f. Is involved in an arrest resulting in a cash seizure of \$5,000 or more.
- g. Is involved in a drug arrest which includes a state or federal weapons change.

- h. Is charged as a second or habitual offender.
- i. Is involved in a drug arrest which results in the recovery of stolen property.
- j. Conspires with others to violate the provisions of the Michigan Public Health Code as described in any one of the sections listed above under Tier 2 Traffickers.

Tier 3 Drug Traffickers:

A Tier 3 Trafficker is any person who does not qualify as a Tier 4 Drug Trafficker, but who:

- a. Is involved in the illegal distribution or possession of controlled substances as classified in Schedule I through Schedule V of the Michigan Public Health Code (except marijuana) or a controlled substance analog or anabolic steroids, in quantities of **at least 50 grams, but less than 400 grams** (in powder or rock form) OR in quantities of **at least 100 dosage units, but less than 1000 dosage units** (tablets, capsule, blotter, or liquid form) in any single offense.
- b. Is involved in the distribution, possession or manufacture of marijuana, psilocybin mushrooms, or peyote in quantities of **at least 50 pounds but less than 100 pounds** in any one single offense.
- c. Is a licensed health care practitioner involved in the diversion of prescription drugs in quantities of **at least 500 dosage units or more** within a twelve-month period.
- d. Operates a laboratory that is used to illegally manufacture controlled substances or controlled substance analogs OR illegally possesses essential and/or precursor chemicals as defined by federal statutes in quantities of **at least 50 grams but less than 400 grams**.
- e. Was responsible for a drug sale that resulted in an overdose or death (regardless of quantity).
- f. Conspires with others to violate the provisions of the Michigan Public Health Code as described in any one of the sections listed above under Tier 3 Traffickers.

Tier 4 Drug Traffickers:

A Tier 4 Drug Trafficker is any person who:

- a. Is involved in the illegal distribution or possession of controlled substances as classified in Schedule I through V of the Michigan Public Health Code (except marijuana) **or** a controlled substance analog or anabolic steroids, in quantities of **400 grams or more** (in powder or rock form) OR in quantities of **1000 or more dosage units** (tablets, capsule, blotter, or liquid form) in any single offense.
- b. Is involved in the distribution, possession or manufacture of marijuana, psilocybin mushrooms, or peyote in quantities of **100 pounds or more** in any one single offense.
- c. Is a licensed health care practitioner involved in the diversion of prescription drugs in quantities of **1000 dosage units or more**.
- d. Operates a laboratory that is used to illegally manufacture controlled substances or controlled substance analogs OR illegally possesses essential and/or precursor chemicals as defined by federal statutes in quantities of **400 grams or more**.
- e. Conspires with others to violate the provisions of the Michigan Public Health Code as described in any one of the sections listed above under Tier 4 Traffickers.
